

HA 1.6%+ SUCCINIC ACID 2.2%

AMBRONCE

**A New Generation Bio-Revitalisation Concept Rooted in
Cellular Science**

THE SCIENCE AND PHILOSOPHY BEHIND AMBRONCE

AMBRONCE is a next-generation formulation designed around the remarkable properties of Succinic acid, a molecule known for its powerful cellular renewal activity and its role in supporting skin metabolism. With its rich amber-inspired identity, AMBRONCE reflects a philosophy of warmth, regeneration and deep revitalisation. Succinic acid, naturally present within cellular energy cycles, has been recognised for its ability to contribute to improved cellular efficiency, enhanced microcirculation and stronger regenerative responses. AMBRONCE harnesses these scientifically established properties, delivering a formulation tailored to improve texture, refine tone, restore luminosity and support the skin's long-term resilience. AMBRONCE offers a sophisticated response for professionals seeking a modern, multifunctional solution for clients who desire smoother, brighter and more revitalised-looking skin.

THE INGREDIENTS

Dual-Weight Hyaluronic Acid Technology

Hyaluronic Acid is one of the most essential molecules for skin health. By utilising both high and low molecular weight fractions, HYAPRONE ensures that hydration and revitalisation occur on multiple levels.

High Molecular Weight HA

This large molecular form sits closer to the surface, creating a moisture-rich layer that enhances elasticity and immediately restores suppleness. It contributes to a smoother appearance, helps reduce trans-epidermal water loss and supports the skin's natural protective barrier. Its ability to hold significant amounts of water makes it essential for comfort, plumpness and overall glow.

Low Molecular Weight HA

Smaller in size, this molecule is able to penetrate more effectively, where it encourages renewal processes within the deeper layers. Low MW HA supports extracellular matrix regeneration, helping the skin maintain firmness, density and resilience over time. This deeper activity contributes to improved texture, a more refined appearance and long-lasting vibrancy.

Together, the dual-weight combination delivers a more comprehensive and sophisticated form of hydration and support than singular HA formulations.

Succinic Acid

Supports Cellular Energy and Efficiency

Succinic Acid is directly involved in the skin's biological energy cycle. By contributing to healthier cellular metabolism, it enhances vitality and supports stronger regenerative responses.

Improves Texture and Surface Smoothness

Its regulatory effect on cellular turnover assists in resurfacing the skin more evenly. This leads to a smoother, more refined texture with visible reduction in roughness and irregularities.

Clarifying and Balancing Action

Succinic Acid helps rebalance the skin environment, reducing the visibility of congestion while promoting a clearer, more uniform complexion.

Boosts Luminosity and Radiance

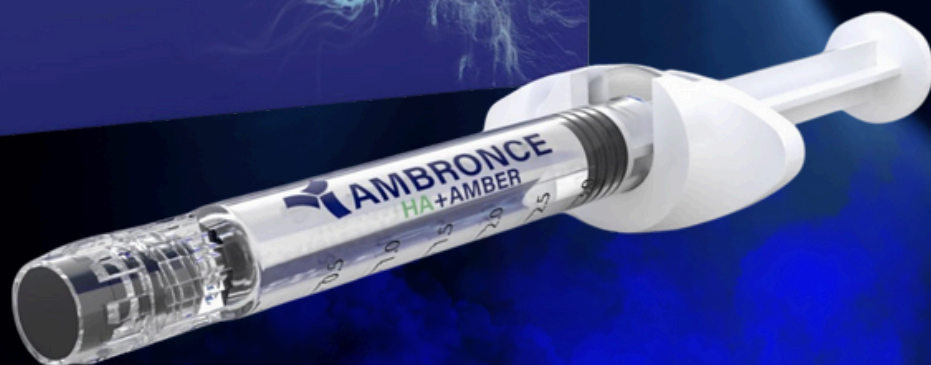

By supporting microcirculation and improving cellular vitality, Succinic Acid helps restore a brighter, fresher, healthier glow to the skin.

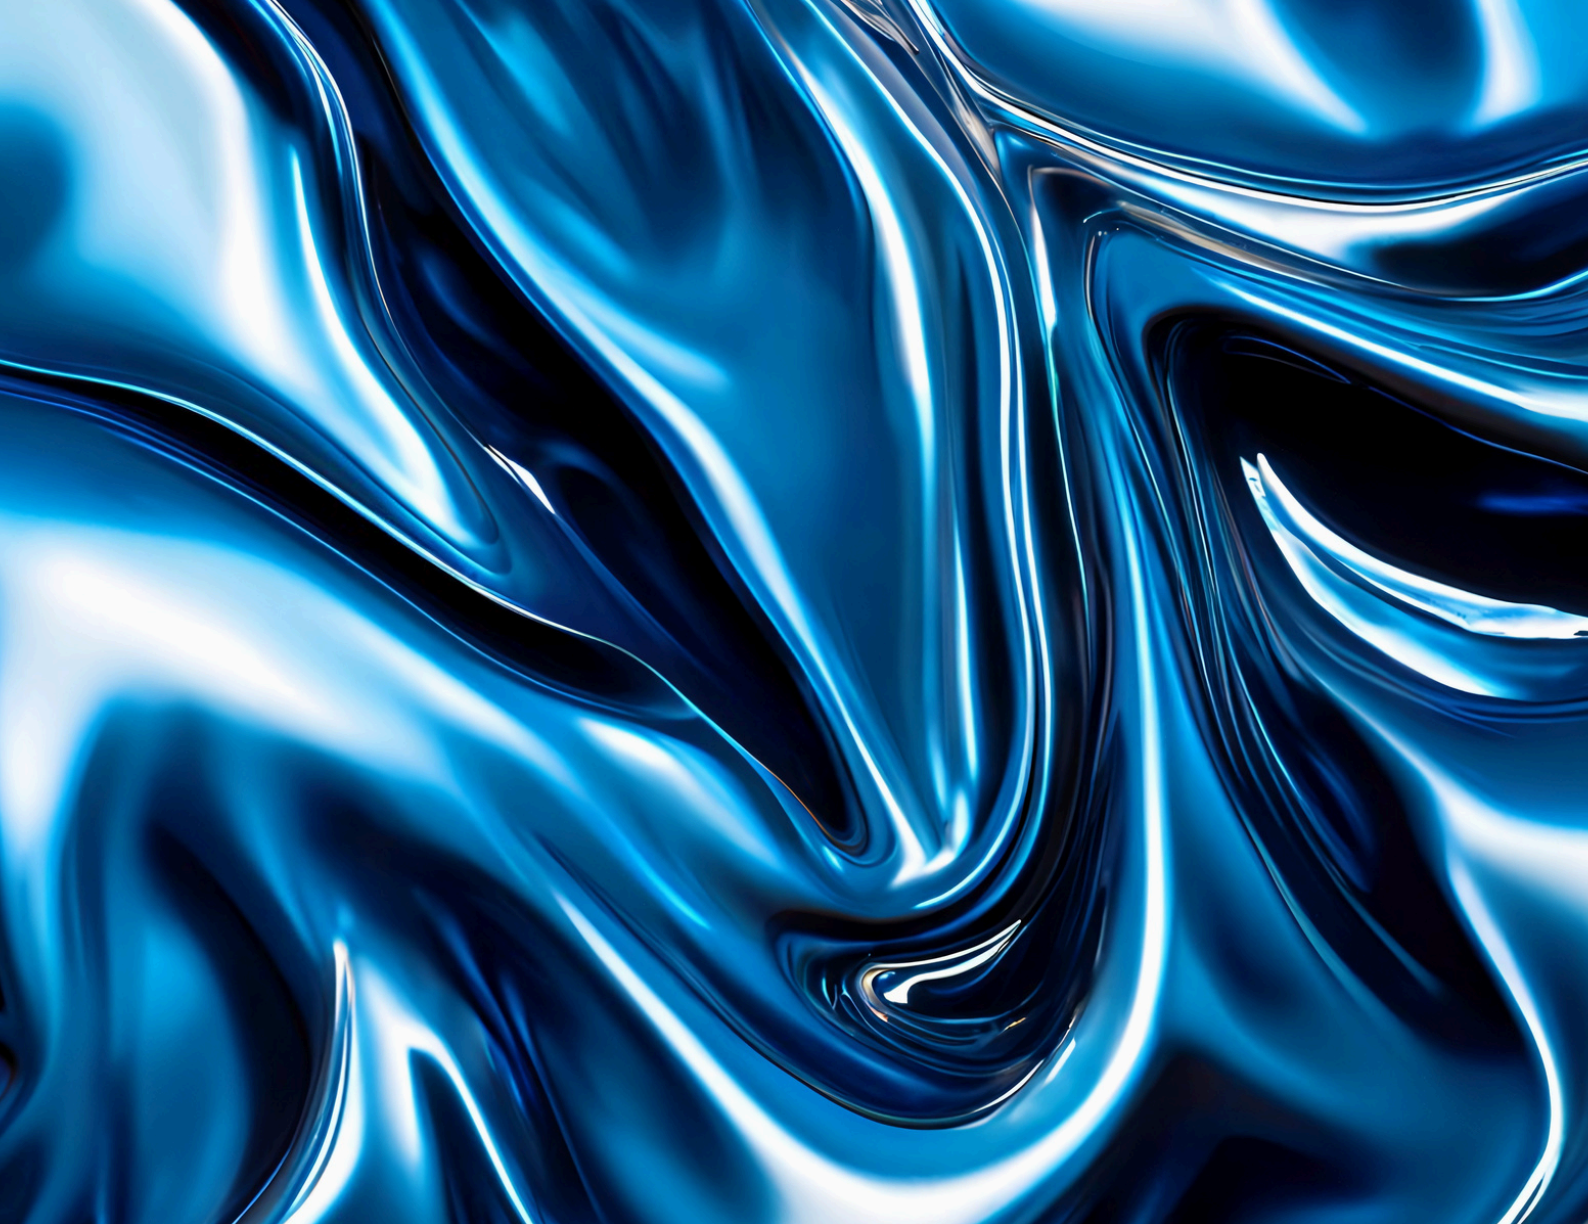

WHO HYAMBRONCE IS DESIGNED FOR

AMBRONCE is ideal for clients seeking a refined yet natural transformation in skin quality. It is particularly suited to individuals who experience:

- Textural irregularities or uneven surface
- Dullness and loss of vitality
- Congestion-prone skin or uneven tone
- Reduced luminosity and lack of glow
- Early signs of aging and metabolic slowdown
- Skin appearing fatigued or lifeless
- Desire for long-term clarity, smoothness and radiance

Its versatility makes it suitable for a wide range of skin types and ages, especially clients who want improvement without heaviness or exaggerated volume.

HOW AMBRONCE WORKS: A MULTI-LAYERED MECHANISM

AMBRONCE's multi-layered mechanism combines biological, structural and metabolic benefits:

- Cellular Metabolism Activation

Succinic Acid improves the efficiency of the skin's energy cycle, leading to healthier cell function and better long-term skin performance.

- Refinement Through Optimised Turnover

By assisting in regulated renewal, AMBRONCE helps polish the skin's surface, minimising the visibility of textural irregularities.

- Balancing Action for Clarity and Uniformity

AMBRONCE contributes to a clearer complexion, reducing signs of congestion and improving overall evenness.

- Enhanced Radiance from Improved Microcirculation

Better nutrient flow and oxygenation contribute to naturally glowing, revitalised skin.

- Gradual Strengthening of the Skin Barrier

By supporting cellular health over time, the skin becomes more resilient, more stable and better equipped to retain hydration and vitality.

APPLICATION TECHNIQUES

AMBRONCE adapts seamlessly to different professional delivery approaches. Practitioners can customise each session based on the skin's needs.

Precision Micro-Applications

Perfect for targeted areas requiring texture refinement, clarity improvement or focused revitalisation.

Uniform Distribution for Overall Glow and Evenness

Ideal for enhancing luminosity and smoothness across larger areas of the face or specific zones requiring balanced improvement.

Micro-Zoning Techniques

Useful for regions affected by congestion, fatigue, unevenness or localized dullness, where Succinic Acid's balancing properties provide maximum benefit.

These techniques give practitioners freedom to tailor each session, ensuring refined, elegant and naturally harmonious results.

- 
- A close-up, high-contrast photograph of a woman's face. The lighting is dramatic, with one side of her face in deep shadow and the other side highlighted by a bright blue light. Her eyes are looking upwards and to the right, and her lips are slightly parted. The skin texture is visible, and the overall mood is mysterious and sophisticated.
- Succinic Acid complex to support cellular energy
 - Refined texture and smoother surface
 - Brighter, more radiant complexion
 - Balanced, clarified skin appearance
 - Improved microcirculation for enhanced luminosity
 - Reduction of dullness and fatigue-related unevenness
 - Gradual improvement in resilience and overall skin quality
 - Suitable for early aging, congestion and textural concerns
