THE SCIENCE BEHIND GLOWLIFT

GlowLift combines Hyaluronic Acid with Calcium Hydroxyapatite in a sophisticated hybrid formulation designed to support hydration, tissue quality and structural refinement.

— HYALURONIC ACID (HA)

Helps bind and retain water, supporting hydration, softness, suppleness and a smoother, healthier-looking skin surface.

— CALCIUM HYDROXYAPATITE (CaHA)

A mineral-based, biocompatible material associated with structural support, fibroblast activity and progressive collagen support over time.

— A COMPLEMENTARY APPROACH

GlowLift combines immediate hydration and support from HA with the longer-term regenerative and structural benefits associated with CaHA.

THE FORMULA

SCIENCE IN SYNERGY.
BEAUTY IN BALANCE.

HYALURONIC ACID (HA)

Hyaluronic Acid helps bind and retain water, supporting hydration, softness, suppleness and a smoother-looking skin surface. Within GlowLift, HA provides the hydration-focused component of the formulation and contributes to a fresher, healthier-looking appearance.

CALCIUM HYDROXYAPATITE (CaHA)

Calcium Hydroxyapatite is a biocompatible mineral-based material associated with structural support and fibroblast activity. It helps support progressive collagen production over time, contributing to improved firmness, resilience and skin quality.

A COMPLEMENTARY APPROACH

By combining HA and CaHA, GlowLift delivers immediate hydration and support from HA together with the longer-term regenerative and structural benefits associated with CaHA.

HOW GLOWLIFT WORKS

TWO COMPLEMENTARY ACTIONS. LASTING RESULTS.

GlowLift combines Hyaluronic Acid and Calcium Hydroxyapatite (CaHA) in a **3% concentration** to work in synergy, delivering immediate hydration and long-term regenerative support for visibly healthier, firmer and more radiant skin.

HYALURONIC ACID (HA)

HYDRATION & SKIN QUALITY

Attracts and retains water, restoring hydration, improving skin texture and supporting a smoother, more radiant complexion.

CALCIUM HYDROXYAPATITE (CaHA)

COLLAGEN STIMULATION & REGENERATION

Stimulates neocollagenesis, supporting the skin's natural regenerative processes for progressive, long-lasting improvement in firmness and structure.

PROFESSIONAL USE

GlowLift is an injectable product intended for professional use by appropriately qualified healthcare practitioners. Patient selection, preparation, injection technique, anatomical placement, volume and treatment intervals should be determined by the practitioner according to the individual's needs and in line with the product's instructions for use.

A complete medical history and individual assessment should be performed prior to treatment. Practitioners should consider relevant contraindications, precautions and potential adverse effects before administration.
